

# THE DELTA SCAM

*“This work was strictly voluntary, but any animal who absented himself from it would have his rations reduced by half.” – George Orwell, Animal Farm*

*“There are three types of lies — lies, damn lies, and statistics.” – Benjamin Disraeli*

It’s amazing how you can lie with statistics when you don’t provide context and/or leave key information out of your false narrative. As of July 4, the entire covid fear narrative was dying out, with cases crashing to new lows and the Big Pharma vaccine profit machine sputtering. That is when those controlling the media narrative began running the stories about the Indian variant and the imminent tragedy. As cases soared over 350,000 per day, the MSM was predicting bodies piling up in the streets.

They failed to give context that India has 1.4 billion people, four times the population of the U.S. On a cases per million basis, India's surge was still 70% lower than the U.S. peak in January. And then the cases collapsed by 75% in a matter of weeks, with no mass rollout of vaccines. But they did distribute copious amounts of ivermectin. Must just be a coincidence. Everyone knows ivermectin is only for cows and horses, per the "experts" at the FDA.

With the Indian case collapse, the purveyors of fear needed to give the Indian variant a new scary name – Delta Variant. So India, with a 10% vaccination rate has seen a complete collapse in cases. Meanwhile, the UK and Israel, with some of the highest vaccination rates in the world, 64% and 60% respectively, have seen huge surges in Delta cases. It's almost as if the vaccines have created the Delta surge. You might even conclude the vaccines are a complete and utter failure, with significant numbers of adverse reactions, 5 months of limited efficacy, and unknown long-term health effects.

### Daily new confirmed COVID-19 cases per million people

Shown is the rolling 7-day average. The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing.

Our World  
in Data

LINEAR LOG

The U.S. "surge" began shortly after July 4th, with the MSM building the Delta fear narrative day after day. Biden, Fauci, Walensky and the rest of the Big Pharma whores did their daily duty of feeding bullshit to the sheep. They bribed corporations, universities and left wing governors to mandate the jab, since they couldn't mandate it Federally.

The mask theater opened again. To hell with the fact that masks have done absolutely nothing to slow or stop the spread of this virus. As they began reporting the case totals again, despite the fact the PCR test was already completely discredited, with the FDA

pulling its EUA and taking it off the market as of 12/31, I noticed what they were not reporting – number of tests.

The number of reported cases in the U.S. went up by 750% since July 4. Coincidentally, the number of tests grew by over 500% since July 4. Why the tremendous increase in testing? If you want more cases, just do more mass testing of people showing no signs of illness. This is why the death rate is 65% lower than when cases were at the same level in February.

A critically thinking individual might look at the data and conclude these vaccines are enhancing the virus and creating the variants. They might also conclude the Delta variant is far less lethal than the original virus. They might also conclude the unholy alliance between the government, mass media, social media, and Big Pharma have ramped up the fear in order to force vaccinations into the veins of vaxx resisters, instilling vaccine passports, and attempting to install a digital surveillance system to track those who resist and destroy their lives.

A critical thinking person might wonder why such coercive measures are being used to inject an experimental gene therapy into our bodies for a relatively non-lethal virus with a 99.7% survival rate. Especially, when it is now beyond a doubt the jab doesn't keep you from contracting the virus, spreading the virus, or dying from the virus. At best, it is a

therapy that may reduce the symptoms for some people. At worst, ADE (antibody-dependent enhancement) will begin to rear its ugly head in the Fall.

The current all hands on deck campaign to discredit ivermectin is a sign of desperation, as they have only been able to coerce and scare just over 50% of the population to have this Big Pharma concoction injected into their bodies. With cases peaking at 155,000 per day, the desperation of Fauci and his acolytes is visible for all to see.

I submitted my strongly worded religious exemption to my employer this morning. I should know within a week whether they will honor it. If they deny it, the ball will be in their court, because I will never have that shit injected into my body. They can terminate me and I will be unbowed. They cannot force me to contaminate my body. I'm a free man and will not take the knee. I will not comply. Resistance is not futile. I hope enough of my countrymen will join me in choosing freedom over servitude.

*“If ye love wealth better than liberty, the tranquility of servitude better than the animating contest of freedom, go home from us in peace. We ask not your counsels or arms. Crouch down and lick the hands which feed you. May your chains set lightly upon you, and may posterity forget that ye were our countrymen.” – Samuel Adams*
